

New Boiler for Steam Ship SS Spiez

Monday, 17 December 2018 14:04 - Last Updated Friday, 25 January 2019 14:17

On December 1, 2018 the new boiler has been lifted into the boiler room of the screw steamer SS Spiez, see pictures taken by Robert Horlacher. The all-new two-cylinder steam engine is unfortunately not yet ready, which is mainly due to the generally excellent workload of the Swiss manufacturing industry. Tailor-made never meant priority within manufacturing processes, but this time it was simply impossible to get things done in an acceptable time frame.
