

DLM will soon start another production run of boiler safety valves that were first produced for the new rack steam locomotives built in 1992 /96. Since then more than 30 safety valves have been manufactured for various steam locomotives in Austria, Germany and Switzerland. Until mid January 2020, it is possible to join the production run and profit from the moderat prices. For techniical data see: <http://www.dlm-ag.ch/spare-parts/57-sicherheitsventil?lang=en>
